A Quantum Leap in Energy Efficiency to Put the Sustainable Development Goals in Closer Reach - DTU Orbit (15/08/2019)

A Quantum Leap in Energy Efficiency to Put the Sustainable Development Goals in Closer Reach

Targeted improvements in the way energy is transformed, distributed and used can accelerate progress toward achieving the United Nations' Sustainable Development Goals (SDGs). Compared to a situation in which no indicators are defined and monitored, tracking progress through indicators would make it easier to reap the full developmental benefits associated with improvements in energy efficiency. We call upon G20 leaders to adopt SDG-specific energy-efficiency indicators, with a view to ultimately accelerating progress toward achieving the United Nations' Sustainable Development Goals.

General information
Publication status: Published
Organisations: Department of Management Engineering, UNEP DTU Partnership, Australian Research Council, European Commission
Contributors: Puig, D., Farrell, T. C., Moner-Girona, M.
Number of pages: 3
Pages: 429-431
Publication date: 2018
Peer-reviewed: Yes

Publication information
Journal: Global Policy
Volume: 9
Issue number: 3
ISSN (Print): 1758-5880
Ratings:
BFI (2018): BFI-level 1
Scopus rating (2018): CiteScore 1.27 SJR 0.68 SNIP 0.724
Web of Science (2018): Impact factor 1.197
Web of Science (2018): Indexed yes
