Catalytic Science and Technology in Sustainable Energy II

This special issue of Catalysis Today results from four sessions, under the collective theme “Catalysis in Sustainable Energy”, of the 2nd International Symposium on Catalytic Science and Technology in Sustainable Energy and Environment, held in Tianjin, China during October 12-14, 2016. This biennial symposium offers an international forum for discussing and sharing the cutting-edge researches and the most recent breakthroughs in energy and environmental technologies based on catalysis principles. Included in this special issue are 36 invited contributions, which is a noticeable expansion as compared with the 29 contributions published two years ago in the previous special issue of Catalysis Today under the same title "Catalytic Science and Technology in Sustainable Energy". We gratefully acknowledge all the authors and reviewers of the manuscripts and the editorial team of Elsevier, without whom the special issue would not have been possible. As the organizer of the EECAT 2016, Y Li expresses his special gratitude to the sponsors, especially Haldor Topsoe and Synfuels China, the participants and the co-organizers for their great contribution to the success of EECAT 2016.

General information
Publication status: Published
Organisations: Department of Chemical and Biochemical Engineering, CHEC Research Centre, Tianjin University, Zhejiang University, University of Twente, Aalto University
Contributors: Wang, Y., Xiao, F., Seshan, K. K., Jensen, A. D., Li, Y.
Pages: 1
Publication date: 2017
Peer-reviewed: Yes

Publication information
Journal: Catalysis Today
Volume: 298
ISSN (Print): 0920-5861
Ratings:
BFI (2017): BFI-level 1
Scopus rating (2017): CiteScore 4.55 SJR 1.347 SNIP 1.329
Web of Science (2017): Impact factor 4.667
Web of Science (2017): Indexed yes
Original language: English
Keywords: Catalysis, Chemistry (all)
Electronic versions:
