Design and simulations of highly efficient single-photon sources - DTU Orbit (08/11/2019)

Design and simulations of highly efficient single-photon sources
The realization of the highly-efficient single-photon source represents not only an experimental, but also a numerical challenge. We will present the theory of the waveguide QED approach, the design challenges and the current limitations. Additionally, the important numerical challenges in the simulations of sources with in-plane emission will be discussed.

General information
Publication status: Published
Organisations: Department of Photonics Engineering, Quantum and Laser Photonics
Contributors: Gregersen, N., de Lasson, J. R., Mørk, J.
Number of pages: 2
Publication date: 2015
Peer-reviewed: Yes
Source: PublicationPreSubmission
Source ID: 112568909
Research output: Contribution to conference › Paper – Annual report year: 2015 › Research › peer-review
