Identification of the cognate peptide-MHC target of T cell receptors using molecular modeling and force field scoring - DTU Orbit (22/08/2019)

Identification of the cognate peptide-MHC target of T cell receptors using molecular modeling and force field scoring

Interactions of T cell receptors (TCR) to peptides in complex with MHC (p:MHC) are key features that mediate cellular immune responses. While MHC binding is required for a peptide to be presented to T cells, not all MHC binders are immunogenic. The interaction of a TCR to the p:MHC complex holds a key, but currently poorly comprehended, component for our understanding of this variation in the immunogenicity of MHC binding peptides. Here, we demonstrate that identification of the cognate target of a TCR from a set of p:MHC complexes to a high degree is achievable using simple force-field energy terms. Building a benchmark of TCR:p:MHC complexes where epitopes and non-epitopes are modelled using state-of-the-art molecular modelling tools, scoring p:MHC to a given TCR using force-fields, optimized in a cross-validation setup to evaluate TCR inter atomic interactions involved with each p:MHC, we demonstrate that this approach can successfully be used to distinguish between epitopes and non-epitopes. A detailed analysis of the performance of this force-field-based approach demonstrate that its predictive performance depend on the ability to both accurately predict the binding of the peptide to the MHC and model the TCR:p:MHC complex structure. In summary, we conclude that it is possible to identify the TCR cognate target among different candidate peptides by using a force-field based model, and believe this works could lay the foundation for future work within prediction of TCR:p:MHC interactions.

General information
Publication status: Published
Organisations: Department of Bio and Health Informatics, Immunoinformatics and Machine Learning, Universidad Nacional de San Martin
Corresponding author: Nielsen, M.
Contributors: Lanzarotti, E., Marcatili, P., Nielsen, M.
Number of pages: 7
Pages: 91-97
Publication date: 2018
Peer-reviewed: Yes

Publication information
Journal: Molecular Immunology
Volume: 94
ISSN (Print): 0161-5890
Ratings:
BFI (2018): BFI-level 1
Scopus rating (2018): CiteScore 3.28 SJR 1.241 SNIP 0.944
Web of Science (2018): Impact factor 3.064
Web of Science (2018): Indexed yes
Original language: English
Keywords: Antigens/Peptides/Epitopes, MHC, Modelling, Pipeline, T cell receptor
