Nacelle Transfer Function

The report describes measurements carried out on a given turbine. A comparison between wind speed on the met mast and Nacelle Wind speed are made and the results are presented on graphs and in a table. The data used for the comparison are the data that are same as used for the power curve report. The measurements have been performed using DTU’s measurement equipment, the analysis and quality control has been performed by DTU.

General information
Publication status: Published
Organisations: Department of Wind Energy, Test and Measurements
Contributors: Kock, C. W., Vesth, A.
Number of pages: 85
Publication date: 2014

Publication information
Publisher: DTU Wind Energy
Original language: English
(DTU Wind Energy WTT I; No. 1069(EN)).
Keywords: DTU Wind Energy WTT I-1069(EN), WTT-I-1069, WTT-I-1069(EN)

Bibliographical note
This is an internal report and therefore not available in full text. Please contact author's or director of author's institute for further information.
