Outbreaks of influenza A virus in farmed mink (Neovison vison) in Denmark: molecular characterization of the viruses - DTU Orbit (08/07/2019)

Outbreaks of influenza A virus in farmed mink (Neovison vison) in Denmark: molecular characterization of the viruses

Influenza in mink (Neovison vison) is assumed to be rare, but several outbreaks have been described during recent years in Europe and the North America. In 2009, influenza A of the subtype H3N2 was detected in several Danish mink farms with respiratory symptoms. Full-genome sequencing showed that the virus was a human/swine reassortant, with the H and N gene most related to human H3N2 viruses circulating in 2005. The remaining 6 genes were most closely related to H1N2 influenza viruses circulating in Danish swine. This virus had not previously been described in swine, mink or humans. PCRs assays specifically targeting the new reassortant were developed and used to screen influenza positive samples from humans and swine in Denmark with negative results. Thus, there was no evidence that this virus had spread to humans or was circulating in Danish pigs. In 2010 and 2011, influenza virus was again diagnosed in diseased mink in a few farms. The genetic typing showed that the virus was similar to the pandemic H1N1 virus circulating in humans and swine. The H3N2 virus was not detected in 2010 and 2011. Taken together, these findings indicate that mink is highly susceptible for influenza A virus of human and swine origin and may therefore act as a potential host/reservoir for influenza A viruses.

General information
Publication status: Published
Organisations: National Veterinary Institute, Section for Virology, Section for Public sector service and commercial diagnostics, Division of Veterinary Diagnostics and Research, Virology, Division of Poultry, Fish and Fur Animals, Section of Fur Animal Diseases and Wildlife, Statens Serum Institut, Holstebro Veterinary Clinic
Pages: 153-156
Publication date: 2012

Host publication information
Title of host publication: Proceedings of the Xth International Scientific Congress in fur animal production: Scientifur volume 36 (3/4)
Publisher: Wageningen Academic Publishers
DOIs:
10.3920/978-90-8686-760-8_21
Research output: Chapter in Book/Report/Conference proceeding › Article in proceedings – Annual report year: 2012 › Research › peer-review
