The ABCD database: a repository for chemically defined antibodies

The ABCD database is a repository of sequenced antibodies, integrating curated information about the antibody and its antigen with cross-links to standardized databases of chemical and protein entities. It is freely available to the academic community, accessible through the ExPASy server (https://web.expasy.org/abcd/). The ABCD database aims at helping to improve reproducibility in academic research by providing a unique, unambiguous identifier associated to each antibody sequence. It also allows to determine rapidly if a sequenced antibody is available for a given antigen.

General information
Publication status: Accepted/In press
Organisations: AI for Immunological Molecules, Bioinformatics, Department of Health Technology, University of Geneva, Swiss Institute of Bioinformatics
Corresponding author: Lima, W. C.
Contributors: Lima, W. C., Gasteiger, E., Marcatili, P., Duek, P., Bairoch, A., Cosson, P.
Publication date: 2019
Peer-reviewed: Yes

Publication information
Journal: Nucleic acids research
ISSN (Print): 0305-1048
Ratings:
BFI (2019): BFI-level 2
Web of Science (2019): Indexed yes
Original language: English
DOIs: 10.1093/nar/gkz714
Source: FindIt
Source ID: 2452657336
Research output: Contribution to journal → Journal article – Annual report year: 2019 → Research → peer-review
